TO ENHANCE THE QUALITY OF CHILDREN'S LIVES

VISION

EDUCATE AND EMPOWER CHILDREN TO MAKE HEALTHY CHOICES SO THEY CAN LIVE FULL AND HEALTHY LIVES

PURPOSE

OUR FOUNDER

TREVOR GRICE, MNZM, CNZM

Trevor was born in Christchurch in 1932, the sixth of seven children. Just before his fifth birthday his father was tragically killed at work. Shortly after, Trevor was admitted for several months to Cholmondeley Children’s Home, his admittance notice read “malnourished and no shoes”.

After these months in care Trevor returned to his family home and resumed his schooling, first at St Annes School and then at Xavier College. World War 2 was having its impact on many families; in the absence of male relatives Trevor worked to support his family at a milk round before school. Moving on after college to Christchurch Polytechnic he achieved the certification necessary to take up a cadetship with the NZ Post Office, becoming a senior telegraphist.

In 1967 he joined the United States Antarctic Program base at Christchurch Airport (Operation Deep Freeze) as a Supply Officer. Over the ensuing years Trevor became increasingly involved with managing issues that arose with service men and women on the ice in Antarctica. Moving to the role of Executive Administrator for

NZ Affairs, his duties now included responsibility for the recognition and treatment of drug and alcohol dependencies. The US Navy provided opportunities for him to attend various treatment centres and institutes in America for continued education. It was through this avenue of his work that Trevor developed a reputation as a family crisis counsellor.

Early in 1987 Trevor was approached to bring the Australian Life Education program to New Zealand. Trevor travelled to meet with the founder, Ted Noffs’, wife Margaret (Ted was in hospital having suffered a severe stroke) and spent a week reading Ted’s books, meeting with programme and sponsor personnel and sitting in on classes. As Trevor read, he fell in love with the idea of Life Education. Central to both his

A child without love is like a child trying to clap with one hand.

LOVE

medical training and the Life Education programme was an understanding of the 'three pound universe', the human brain. The idea that children could be given so much knowledge and empowerment was revolutionary.

In May he resigned from his job with the United States Navy to work for Life Education New Zealand. Fast forward ten years and more than 30 regional Trusts had been established and \$30m had been raised as Trevor shared his vision and enthused volunteers nationwide. This resulted in 200,000 children a year taking part in lessons in mobile classrooms. In 1996 Trevor and Tom Scott, along with the Publishing Trust, produced their New Zealand best seller *The Great Brain Robbery*. *The Great Brain Robbery* has subsequently been translated into several languages and is globally available.

In 1997 Trevor was made a Member of the NZ Order of Merit (MNZM) and in 2000 he was named as a UNESCO Peacebuilder. Rotary International made Trevor a Paul Harris fellow in 2004. In 2000 and 2005 he was named Wellingtonian of the Year for Community Service and Youth Services and in 2010 was further recognised as a Companion of the New Zealand Order of Merit (CNZM).

The founding and current Trustee of Life Education Trust (NZ) Trevor retired from his 'day job' with Life Education in 2014 at age 82. Trevor is still very much a part of Life Education.

Trevor Grice, MNZM, CNZM
Founder

PHILOSOPHY

Growing up in part determines who you are and who you'll be as an adult. Behaviours developed during childhood and early adolescence are predictors of adult behaviours.

You are

UNIQUE

Never before and never again will there be another child just like you. We try to make each child feel comfortable with their identity and to show them how special they are.

1.

The human body is

MAGNIFICENT

We capture children's imagination using technology that shows them the magnificence of the human body, how it functions and what its needs are.

2.

We need to

SUPPORT & RESPECT

each other, because of the delicate and complex nature of life.

3.

5

Our philosophy is based on three principles...

CHAIRMAN'S WORDS

CHRIS KIRK-BURNNAND

During 2015 our focus has been on programme development and implementing change. When I reflect on the last six years, I see the implementation of our long term plan to develop the quality and technical excellence of our programmes in a manner that cements us as a leading education provider within New Zealand.

Upgrades to our Mobile Learning Centres that largely will be completed during 2016, the continued development of support and quality control measures for our Educators, maximising the utilisation of resources, and ensuring all Community Trusts achieve levels of financial efficiency and effectiveness have all been key components. Of major importance in 2015 has been our commitment to expand the programmes in our “Lesson Lab”. Whenever I talk to school teachers they express their support for how Life Education is aligning its programmes with each school’s unique learning needs and environment. This is a significant move that will see Life Education programmes and teaching methodology

align to future education pedagogy, which is central to successful education outcomes in a fast changing world.

Two Trustees are due to retire from the Board at the first meeting in 2016. Jo Coughlan has been a real strength on the Board. Her support to our CE and her business contacts have benefited Life Education along with her strong community commitment. Thanks a lot Jo for your support as Trustee and deputy Chair. Ray King has represented well the South Island with an efficiency and effectiveness that all Trusts would like to achieve. Again, thanks Ray for your support and good judgement.

Life Education's goal is to have "No child left...

BEHIND

As a Board we are proactive in identifying challenges that will face us and working to mitigate these or to turn them into opportunities. Certainly we have become a research lead organisation and we call upon peer review where required. We have a clear commitment to motivate and bring leadership to our Community Trusts. Leading and guiding our volunteers is a key focus of our Board and critical to our community funding and integrating our Trusts within each community.

A special thanks to Community Trustees, Educators and our National Service Centre Team led by John O'Connell, also from my heart thanks to our key sponsors, supporters and Board members. Life Education continues to have an increasing positive impact for our youth.

Thank you all for your support.

Chris Robinson

FROM THE CHIEF EXECUTIVE

JOHN O'CONNELL

Increased accountability, outcomes focus, demonstrated results and demonstrated need are increasingly common phrases for charities seeking financial support from the community. It's also common language in our education system to be able to demonstrate learning outcomes achieved with students. All of this means we're in a competitive environment, and we need to be capable of demonstrating our value and what we achieve.

Successes and Celebration

Being abreast of leading education practice, this year we began the shift from our entrenched programme of a number of modules to a flexible 'concepts and big question' model, consistent with inquiry learning and the New Zealand Curriculum. In February we launched our online planning tool, enabling us to create lessons with teachers to best meet the specific needs of each school community. It means we're adopting leading education practice and a shared planning approach to achieve the best outcomes for each child. This sees us as a leader amongst external education providers to schools.

With a comprehensive health programme, 48 Educators working nationwide with more than 1,800 schools and 15,000 teachers, implementing that sort of change on a shoe string budget is no easy task!

CONTINUE OVER...

GOING UP!

Over the last 12 months, we've undertaken an ambitious workload and have enjoyed success...

A target of 15 classrooms upgraded with our new 3G technology – achieved 21 upgrades

Launched the first phase of our online teacher planning tool, with Phase Two ready for launch in January 2016.

Our 2014-17 Education Plan, which captures our programme and resource development work, is ahead of target

We have improved the key measures within our school evaluation results

We grew the number of children taught by Life Education in a single year to a record level of 258,761 children from 1,527 schools.

Challenges and opportunities

In the next 12 months our challenge is to sustain the ongoing development of new resources to accompany the shared planning and inquiry learning approach. Much of this is about the shift to have our learning resources for children and teachers accessible 'on line', to ensure we are an integral part of their learning in the classroom, so we can be truly effective.

When Philanthropy NZ released their latest research ***Giving New Zealand: Philanthropic Funding 2014***, it was disappointing to see business support of charities is in decline. So we are increasingly grateful to our major partners - Mainfreight, The Warehouse and Frucor - for their strong corporate values and ongoing support.

The Philanthropy NZ research reinforced the high level of personal donations to charities in New Zealand. Our challenge is to put in place a donation programme to enable people to identify and then easily adopt Life Education as their charity of choice. This requires additional resources.

With 27,000 registered charities in New Zealand increased expectations to demonstrate real value is a good thing, however, being able to do so and demonstrate your role in improving social outcomes is far more complex today.

So in a competitive world, what is Life Education's point of difference?

- **Effective cost structure:** A volunteer structure across our 33 regional Trusts providing 25,000 hours of volunteer time each year. As a result, just 3.4% of our expenditure is spent on administration and fundraising, wages and salary costs.
- **Professional skills:** An organisation recognised for our professional practice by being accredited by the NZ Teachers Council to maintain our Educators' New Zealand Teacher Registration. All our Educators are registered, specialist teachers.
- **Evaluation:** An independent and ongoing evaluation process with every school teacher invited to provide their feedback after attending our lessons - 11,000 each year.
- **Valued:** 96% of teachers agreeing they would recommend Life Education to schools in their area. Our focus on shared planning with teachers will continue to see improvements in our relationship with schools, as we work to focus on their needs.

And in terms of the difference we're making in our communities?

Positive trends in reductions of youth smoking, trying marijuana for the first time, binge drinking and those experiencing bullying - [Youth2000 Series National Survey of the Health and Wellbeing of Secondary School Students in New Zealand.]

The common factor influencing attitudes of youth across these measures in the Youth2000 series over a sustained period of time is education. 80% of New Zealand children take part in Life Education at their school in their formative years.

Which is why Life Education is used by more and more schools every year to support the health education needs of children in their community. So in a competitive environment, those who play an important role in children's development value the role Life Education Trust plays and that's a great endorsement!

The challenge for us is to share that story with our wider community and potential supporters, within our very lean administration and marketing model, so we can continue to educate and empower children to make healthy choices and live full and healthy lives.

JOHN O'CONNELL, CHIEF EXECUTIVE

WORLD CLASS METHODOLOGY

Educating and empowering children

There are three internationally renowned pillars of harm minimisation, the Life Education programme falls under pillar 2.

Demand Reduction strategies require more than just imparting content and facts. An integrated approach to improved mental health and wellbeing is important for demand reduction strategies to be effective.

Actions that seek to contribute to better health, wellbeing and life outcomes are an integral feature of effective harm minimisation programmes.

A Life Education child will undertake a journey through age five to 13 years that will explore their relationship with others, understand their identity and self-worth. This is well entrenched in our philosophy of:

- **You are unique**
- **The human body is magnificent**
- **Support and Respect**

The five strands of our programme capture the holistic approach to mental health and wellbeing, resilience strategies and improved knowledge.

Demand Reduction

Improved knowledge through education and strategies to empower people to make informed decisions and effect change in their environment.

Alcohol and other drug education programmes have an important and measurable role to play

In 2013 the Ministry of Education was requested by the Prime Minister to provide an evaluation of programmes as part of the Youth Mental Health strategy.

That report prepared by Dr Jenny Robertson was consistent with the internationally renowned three pillars to harm minimisation: education supports increased knowledge, mental health and wellbeing.

Following this extensive research and evaluation, this year the Ministry of Education produced new guidelines for schools titled “Alcohol and other Drug Education Programmes; Guide for Schools”.

The Ministry of Education’s position: “Alcohol and other drug education programmes have an important and measurable role to play”. The guide goes further, advising that effective programmes in schools require teachers with specific knowledge, understanding and expertise.

1 MILLION

... children were harassed, threatened or subjected to other forms of cyber bullying on Facebook during the past year. (Consumer Reports, 2011)

DEMONSTRATING BEST PRACTICE

Inclusive planning

‘With high level accountabilities for ensuring all students achieve, valuable teaching time gives priority to learning designed to meet the unique learners in every classroom. One size fits all off the shelf programmes are not part of current teaching and learning practice.’

(Dr Jenny Robertson, 2013)

Our trained, registered specialist health teachers undertake an integrated planning approach with each school, to best meet the learning needs of each child. This is consistent with the Whole of School approach and the New Zealand Curriculum.

Our online interactive lesson planner, launched this year, was our most significant programme change in many years. Educators construct lesson plans with teachers using concepts and big questions consistent with inquiry teaching in the New Zealand Curriculum. This ensures we have a flexible and responsive shared planning approach with each school community, consistent with best practice. The most appropriate resources to support the school teacher in the classroom are made available as an outcome of that planning process.

CHILD OBESITY

8% → 10%

The child obesity rate has increased from 8% in 2006/07, to 10% in 2011/12.

(Health of NZ Children 2011/12)

Our online planning tool, launched this year, enables us to undertake shared planning and respond to each school community and the individual learning needs of children.

Leading professional practice

“Effective AoD education programmes require teachers with the specific knowledge, understanding and expertise and personal attributes to facilitate quality learning.” (*Alcohol and other Drug Education Programmes Guide for Schools, Ministry of Education 2014*)

Skilled Educators are one of the most important considerations in evaluating the effectiveness of demand reduction programmes in schools. Our Educators are specialist, registered teachers. Educators come together from across the country three times a year. They also each have a mentor and undertake a prescribed evaluation and goal setting process. We have a team of Senior Educators who provide an additional layer of support and the Senior Educator pathway offers further career and personal development.

We have a comprehensive process of evaluation to support our Educators in meeting the Registered Teacher criteria. This is reflected in the New Zealand Teachers Council accreditation of Life Education to assess and renew teachers' registration requirements, one of very few independent organisations to have this status.

Over **75,000**

children learn about the effects of tobacco through Life Education lessons each year.

RESEARCH INDICATING SUCCESS

Evaluating our success

Measuring the effectiveness of education programmes that seek to reduce demand is complex and expensive, however best practice approaches are universally accepted. An independent peer review in 2013 undertaken, by leading educationalist Mary Chamberlain, enabled Life Education to develop our 2014-17 Education Plan.

At this time Research NZ were commissioned to establish an evaluation process. The class teacher attends each lesson taught by Educators and these 11,000 teachers are invited to provide feedback across a range of measures. The process is continuous and updated monthly. It enables us to evaluate our programme, our teaching practice and our value in supporting schools so we can make informed decisions.

Through the focus in shared planning practice with schools to best meet individual needs we are pleased to report in the last 24 months a 15% improvement in our programme, better meeting the needs of individual school classes.

96%

...of Teachers strongly agree or agree that
“Life Education helps provide children in my school with the information they need to make positive decisions”

Demonstrating outcomes

OUTCOME

A positive trend of reduced binge drinking, smoking, bullying and marijuana use amongst youth.

In the last 15 years, 80% of New Zealand's school children have been active learners in Life Education's programme through their primary and intermediate school years.

In the University of Auckland's Adolescent Health Research Group 2001, 2007 and 2012, more than 8,500 New Zealand secondary school students were surveyed about their lives. The research is most commonly referred to as the Youth 2000 Series and is the largest survey of youth health and wellbeing in New Zealand.

This data series shows the number of young people who have tried cigarettes has more than halved – from 53% in 2001 to 23% in 2012 – and regular smoking has reduced by one-third. The number of youth who reported they had tried marijuana almost halved in that period.

The trend also shows a drop in teenage binge drinking, from 40% of young people reporting binge drinking in the past four weeks in 2001, to 23% in 2012. Less victimisation through violence, sexual coercion or abuse, and reduced levels of risky driving was also reported.

Alcohol, smoking, marijuana and bullying have each had different emphasis in the three pillars of harm minimisation. Supply Control saw significant changes with alcohol and smoking law reform and punitive tax measures in the case of tobacco. Tobacco became less accessible while alcohol became more accessible to youth with the age reduction. Access to marijuana was unchanged.

Despite different approaches to Supply Control, the trend across these measures is positive with the one consistent tactic being Demand Reduction. As the largest provider working in schools, Life Education is understandably proud of this positive trend.

WE LOVE OUR SPONSORS

FRUCOR

Frucor as a company and as a team, like to help others out whenever they can. As a long term partner of the Life Education Trust, Frucor are proud to have helped 1000's of kids learn to make positive choices about their health, wellbeing and nutrition.

MAINFREIGHT

Mainfreight's team culture and commitment to valuing people is demonstrated in all aspects of their business. Mainfreight and Life Education have a proud long standing relationship forged through a common goal to support the children of New Zealand.

THE WAREHOUSE

The Warehouse's community goal is to enhance the lives of family and young people throughout New Zealand. Our annual fundraising campaign raised over \$285,000 in February and very importantly allowed the New Zealand community to support our cause.

Independence means we are dependent on our partners valuing what we do. We have a family of national sponsors who together make up one third of our income. However, more significantly, it is in the form of long term contracts that enable us to plan and commit to initiatives beyond a single financial year.

OUR CHARITY GAMING PARTNERS

New Zealand Lottery Grants Board have partnered in the redevelopment of our Mobile Classrooms used by communities throughout New Zealand. The upgrade of our Mobile Classrooms is a cornerstone in our development to see Life Education remain a lead provider supporting children to grow to be the best they can be.

Lottery Grants Board
Te Puna Tahua
LOTTO FUNDS FOR YOUR COMMUNITY

Charity gaming distributes in excess of \$200m to community organisations each year. As one of the many worthy recipients from these funds we are proud to have the gaming industry as a valuable supporter.

Pub Charity is a significant and invaluable supporter to Life Education Trust (NZ) and our 33 Community Trusts. Their continued support, confidence and belief in what we do enables us to plan with confidence and ensure we can provide the very best support for children growing up in our communities.

The Lion Foundation and The Southern Trust also support Life Education (NZ) and we're proud they value the role we make in building stronger communities.

There are a number of other Charity Gaming partners who support our community trusts locally and their contributions are greatly appreciated.

LIFE MEMBERS

* deceased

The big seed of Life Education's goodness is...

LOVE

Love is an irresistible necessity, for
children without love are like children
trying to clap with one hand.
